TRA DIRECTORY 2023

The Thai Rubber Association was established in 1951. Presently, TRA has 39 processing and exporting companies as its members. Together, these enterprises produce and export about 80% of the national Natural Rubber production in various forms, viz. Technically Specified Rubber, Concentrated Latex, Ribbed Smoked Sheet, Compound and Mixture Rubber, etc. The Association is recognized by the Government and is respected by the public as the central organization in which the government and the private sector can get together.

Preface

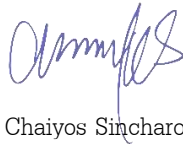

Natural Rubber is one of the most important agricultural products of Thailand and the world. Currently with more than 5 million tons of NR production per year and value more than 8 billion US Dollars per year from the export, Thailand has become the largest NR producer of the world since 1991. On account of strong encouragement and attractive NR price, many private sectors and smallholders have been enlarging their planting areas. In the next few years, the expansion of rubber cultivation for increasing production is expected to meet strong demand from end-users, particularly China and India.

Thailand and China, as the world largest NR producer and consumer respectively, have continually very long and close relationship. In addition, the close cooperation and assistance among government and private sectors of both countries cause the tightening friendship. Rubber enterprises of the two countries also give full support for all relevant activities, which were organized by each other. In addition, Africa has become a new interesting export market and an attractive foreign direct investment destination amid the slowing economies of mature markets, namely the USA, EU, and Japan. Exporters resort to Côte d'Ivoire, a country in Africa, is the most promising new rubber producer and is growing rapidly.

Presently, the Thai Rubber Association (TRA) considers that natural rubber still has positive economic fundamentals, especially with the increase in demand for rubber gloves globally due to the COVID-19 outbreak. The

demand for EV cars increases as well. Moreover, Thailand, Indonesia, and Malaysia strong cooperated under the International Tripartite Rubber Council (ITRC) to roll out significant measures to handle various situations. In addition, Thai government has rolled out measures to help smallholders and entrepreneurs as well.

All activities held by TRA were completely successful due to kind cooperation and assistance from the committee, members, government officials and consumers. We wish that the administrative policies of the committee and continual support of all the above-stated sectors would bring great success and fair benefits to all members in the rubber industry.

Mr. Chaiyos Sincharoenkul

TRA President

TRA History

The Thai Rubber Association

สมาคมยางพาราไทย

泰國橡膠總會

Established in 1951, the Thai Rubber Association (TRA) currently comprises of 39 processing and exporting member companies. Collectively, these enterprises produce and export about 80% of total Thai Natural Rubber production in various forms, viz. Technically Specified Rubber, Concentrated Latex, Ribbed Smoked Sheet, Compound and Mixture Rubber, etc. The Association is recognized by the Government and is respected by public sector as a central organization in which the government and the private sector can contact and elaborate.

Background

On March 5, 1951, the Thai Rubber Association was established by those early traders under the name of "The Rubber Traders Association of Thailand". Its objectives were to serve as the central organization of companies comprising rubber producers and traders to foster cooperation between them as well as acting as the central entity for government agencies to contact the group and discuss or negotiate about matters of common interest.

From that humble beginning, the Association has also been the driving force in pushing innovative activities concerning career development along with up-grading its members' standards of business administration.

The main purpose of the establishment of the Association at the beginning was to solve problems due to the non-regulated trade that lacked any rules and regulation. Buyers and sellers were free to trade and thus could satisfy their own needs and wishes without considering the impact on the trading as a whole. Understandably, there were problems of poor-quality goods as well as difficulties of contractors who did not follow or abide with contracts. This occasionally resulted in lengthy disputes and harmed the trade and its traders.

Consequently, a gathering of rubber traders calling themselves "The Rubber Traders Association of Thailand" was formed with the prime objectives to eliminate unfair trading and to support its' honest trading members in accordance with formulated rules and regulation.

The office was appropriately located at the Bangkok Chamber of Commerce. The first meeting of the association was conducted on March 5, 1951. In its formative years, there were already 15 members including both ordinary members and special members.

It took the Association almost two decades to become a regular member of the Thai Chamber of Commerce. On the 29th of February 1968 the permit to become a trade association was given by the registrar of the Government Authority. The office was relocated at 57 Soi Rong Muang 5, Rong Muang Road, Pathumwan District, Bangkok under the name "The Thai Rubber Traders' Association".

DEVELOPMENT

The rubber production of Thailand increased not only by strong demand from the world market, but was also stimulated strongly through the replanting program of the Thai Government from 1961 onwards. This resulted indirectly in the establishment of rubber processing factories and rubber trading companies. As these professional groups needed to be in close contact with the farmers and plantation owners, their activities spread throughout the rubber growing area in the South.

The number of members of the Thai Rubber Traders' Association has, therefore, increased and presently comprises 39 leading companies. Some of these companies are rubber processors while others are traders.

MOVING TO THE SOUTH

With the main town of Hatyai in Southern Thailand becoming a full-blown commercial centre, and with the establishment of the Deep-Sea Port in Songkhla, there was good reason to have the Association moved to the south. Not only is that the main rubber growing area with many rubber factories and intensive transport and trading activities, it is also close to our neighbor country Malaysia, the then world's third biggest producer and exporter. In 1992 the Association moved to the town of Hatyai, Songkhla Province and founded its office at 4/14 Thepsongkraw Rd.

In 1993 its members agreed to change the Association's name to the "Thai Rubber Association". In the following year the office was moved to a more appropriate property: 45, 47 Chotevittayakul 3 Road, Hatyai, Songkhla its current seat.

Objectives

- (1) To promote the trading of natural rubber;
- (2) To encourage and help members to solve problems and overcome obstacles, this includes to enter into negotiation with persons outside the Association, for mutual benefit in the trading of natural rubber; and to conduct intelligence study on the natural rubber markets, both domestic and foreign, for the benefit of the natural rubber trade;
- (3) To conduct research on the natural rubber trading and to exchange and disseminate technical information and knowledge on the natural rubber trade;
- (4) To collect statistical or documental or other information concerning rubber trade from all members but with the consent of members concerned;
- (5) To promote the standardization of rubber qualities; to research and improve on the processes of smoking, grading, powdering, packing as well as marketing;
- (6) To co-operate with the Government in the promotion of natural rubber trade;
- (7) To seek agreement or to establish rules of conduct for members to observe to ensure efficient conducting of the natural rubber trade;
- (8) To arbitrate in any conflict between members themselves or between members and person, or persons outside the association in matters related to the natural rubber trade;
- (9) To abstain from political activities;

(10) To own an immovable property by buying or receiving with fascination or being donated in order to run all activities of the Association;

(11) To publish monthly news distribute to members and others.

(12) To organize activities in order to get an income; for example: Annual Dinner and Golf Tournament.

(13) To arrange conferences and seminars, both in Country and abroad.

(14) To participate as a member of the other associations, both in Country and abroad.

(15) To donate or support for any activities of the other associations within Country and abroad.

(16) To obtain the annual membership subscription fee, the extraordinary subscription fee, donation fee from members and general person.

(17) To proceed any matter depending on the agreement and assignment of the meeting.

Activities

1. Member Services

- Rubber Information
- Technical & Business Know-How
- Rubber Business Disputes
- Rubber Marketing

2. Cooperation with the Government

- Present as government committees
- Support Research and Seminar

3. Co-operation with International Rubber Organization

- Member of the International Rubber Association
- Member of the ASEAN Rubber Business Council
- Endorsement of "The Green Book"

Policies

The policies of our team are to strengthen the members' unity to reach the following objective;

1. To transparently administer with good governance.
2. To protect the most benefits of all TRA members as a main target.
3. To cooperate with various government & private sectors both in domestic and abroad.
4. To give full cooperation with rubber-producing countries around the world, particular Asian group.

5. To be a center of cooperation among producers & consumers included seeking for any resolutions in rubber-business problems for mutual victory together between producers & consumers.
6. To build up a close relationship among all TRA members & the Association in order to achieve the firm development of Thai rubber industries.
7. To encourage the strength in trade & rubber industries of TRA members.

Natural Rubber in Thailand

In 1991, Thailand became the world's largest producer and exporter of natural rubber (NR), as the result of an accelerated rubber planting scheme. Structurally, the plantation sector is dominated by smallholders, accounting for 95% in terms of area under rubber.

Rubber is essential for life and living of more than six million rubber farmers and their families, and hundreds of thousands of people engaged in the trade, export and manufacturing of rubber products.

The Thai Government has the political will and a clear policy to develop the rubber industry for improving the living conditions of the smallholders.

Rubber Tapping area and rubber production

In 2020, the Rubber Tapping area in Thailand was 3.52 million hectares. Of this, 57 % is in the Southern peninsular, 26 % is in the Northeast and about 10% is in the Central of the country. (Source: Office of Agricultural Economics)

In 2021, the NR production of Thailand was 5.17 million tons. The NR production was about higher than the previous year 16.97 %. (Table 1)

Table 1 Thailand's rubber production 2012-2021 (million tons)

Year	Production	Percentages of change
2012	3.78	5.90
2013	4.17	10.32
2014	4.32	3.60
2015	4.47	3.48
2016	4.54	1.57
2017	5.13	13.00
2018	5.08	-0.97
2019	4.74	-6.70
2020	4.42	-6.75
2021	5.17	16.97

Rubber Export

In 2021, the NR export of Thailand was 4.18 million tons. The NR export was about higher than the previous year 10%. (Table 2) In terms of rubber exports, about 80% of the rubber produced by Thailand is exported to the main consuming countries. In 2021, the bulk of the rubber export was block rubber (40%), Compound rubber (28%), concentrated latex (17%), ribbed smoke sheet (12%), and others (3%).

Table 2 Thailand's rubber export 2012-2021 (million tons)

Year	Export	Percentages of change
2012	3.12	5.76
2013	3.66	17.30
2014	3.77	3.01
2015	3.75	-0.53
2016	3.89	3.73
2017	4.44	14.14
2018	4.51	1.58
2019	4.04	-10.42
2020	3.80	-5.94
2021	4.18	10.00

Thai NR Consumers world-wide

Thailand exports rubber to more than 70 countries all over the world. In 2007, China was the largest importer of Thai rubber with 827,369 metric tons, followed by Malaysia with 413,049 metric tons and Japan with 405,599 metric tons.

Rubber consumption

In 2021, the NR consumption of Thailand was 925,829 tons. a mere 18 % of the total production. The NR consumption was about higher than the previous year 59 %. (Table 3).

Table 3 Thailand's rubber consumption 2012-2021 (tons)

Year	Consumption	Percentages of change
2012	505,052	3.76
2013	520,628	3.08
2014	541,003	3.91
2015	600,491	10.10
2016	617,269	2.79
2017	653,243	5.83
2018	631,635	-3.31
2019	663,084	4.98
2020	581,585	-12.29
2021	925,829	59.19

Source: Rubber Division, Department of Agriculture

Conclusions

Thailand is making a strong effort to remain the world largest producer and exporter of NR during the first decade of the new millennium. Although the export of raw material of natural rubber is still the main output of the Thai NR agro-industry, the medium-term target to produce high quality NR of specific types to meet the world demands. For example, NR production will focus more on block rubber and concentrated latex while RSS still being produced to serve a niche-market. Further diversification in raw and preprocessed rubber can be expected. In addition, risk factors that need to be monitored are as follows: Pestalotiopsis leaf fall disease, Geopolitics, Global warming, deforestation, sustainability and traceability.
